

Calling all second-year Biology and Genetics students!

Are you interested in any of the following areas?

- Environmental Sciences
- Healthcare
- Cell Biology
- Aging

Register for a section of **BIOL/GEN114X** (1 cr.) to be a part of these experiences in Fall 2022!

- Connect with like-minded peers
 - Engage with knowledgeable and experienced Peer Mentors who care about your career and academic progress
 - Network with faculty in your field of interest
 - Develop goal-oriented academic and professional skills
 - Academic Support: Optional reserved seats and study groups for GEN 313/L and CHEM 331/L
- QR code for more information

Section 1. Save Planet Earth

Monday 3:20 – 5:15 PM

An environmental and conservation-themed section where students learn and connect via hands-on sustainability projects, as well as field trips to research sites around Ames.

Section 2. Helping People: The Health Care Career Spectrum

Monday 3:20 – 5:15 PM

Meet with practicing professionals and learn about the myriad healthcare-related career options that align with your interests and life goals.

Section 3. Exploring the Secret Life of Cells

Wednesday 3:20 – 5:15 PM

Learn how cell biology research in different organisms can help us improve our world in areas such as medicine, agriculture, and technology. Experiences include hands-on lab activities and visits to research labs around campus.

Section 4. Decoding Genetic Mechanisms of Metabolism and Aging

Wednesday 3:20 – 5:15 PM

Authentic research experiences and learning opportunities using cutting-edge genetic and cell biology approaches. Interrogate cellular metabolism, aging, and age-related diseases.
